AI like *DeepSeek* seems to be stealing all the headlines at the moment. Recent AI software can build presentations, analyse and enter data, write content, and do multiple other tasks. AI will certainly take some jobs from us, but it will be creating new ones!

- What do you use AI in your everyday life for?
- Do you enjoy interacting with chatbots and voice assistants? Are they helpful? Do you trust AI recommendations for films, places to go to, or things to buy?
- What jobs (3 or more) do you think will be done by computers and machines in the future?
- What current professions (3 or more) will stay in demand in the next 3–5 years? Why?
- In what way will AI probably change education and the traditional classroom?

Answer the questions. Speak for **3 minutes** continuously. Do not forget to include an opening and closing comment.
